## **Automotive aftermarket manufacturer 230,000+ square foot distribution center**

**Project:**

Automotive aftermarket manufacturer 230,000+ square foot distribution center

**Project Objective:**

Expand into new space to increase capacity for in bound product from off shore.

**Project Scope:**

Provide design and planning assistance for racking system to maximize storage. DAK worked with the customer reviewing multiple site options to help select the best option. After designing a double deep racking solution DAK provided and installed the racking, wire deck and guarding.

**Project Data:**

Building size: 233,000 square feet.

Number of pallet positions upon project completion ~12,000

**Solutions Used:**

Ridg U Rak and Interlake Selective Racking

Hilti Anchors

K3 Wire Deck

K3 End or Row guards

Labor

Project Management

Structural Calculations and site inspections.
