

## DePaul University Rec Center

Project: DePaul University Rec Center, Chicago IL  
When: August, 2017

### **Project Objective:**

Lockers are phenolic wood-grained material and fabricated by Columbia Lockers (PSISC – Columbia, South Carolina). Waterproof and corrosion proof. Design and build 469 lockers and install over a two-week shut down period. Lockers are 4-tier, 2-tier Z-door and single tier; all 72" high with custom-fit slope tops and custom corner panels and finished end panels. Locks are both key style and combination with master keys. ADA lockers provided as part of the project. Project included demolition and removal of existing metal lockers in very tight conditions.
